## OUR STRONG POINTS

### CUSTOMISED SOLUTIONS

Having gained vast experience from over 80 years of activity, Fava is renowned for its sensitivity to the customers' requirements, with support of the laboratory for technological tests and an expert engineering service.

### CONTINUOUS INNOVATION

We manufacture lines that improve the quality of the product and help people to manage production in a simple and flexible manner.

### FAVA TRAINING CENTER

A training school for the preparation of technicians, technologists and R&D personnel regarding the production of pasta.

### QUALIFIED R&D LABORATORY

It has the most advanced laboratory equipment, where various dough-making tests can be carried out for the design of our lines.

## HISTORY

- 1937**  
 The first continuous short-cut pasta dryer, called the shaker (trabatto) is created from Augusto Fava's idea.
- 1956**  
 Enrico Fava, Augusto's eldest son, enters the company. The Teless dryer is launched in the same year; one of Fava's most brilliant patents.
- 1973**  
 Now, it is the second generation's turn: Augusto leaves the company in the hands of his son Enrico in an exciting period thanks to the ATR technology.
- 1989**  
 Luigi Fava joins the company and in the same year the ITRG long-cut pasta drying line technology is launched; Fava's longest-lasting and highest-performing range of pasta lines.
- 2015**  
 The GPL 180 is presented to the public. A discovery destined to revolutionise pasta-making processes.

## THE NUMBERS

### LINES INSTALLED PER TYPE, LAST 20 YEARS
